

INNO-FIX FOX FUGA CLEANER

Joint Filler Cleaning Detergent

Description

FOX FUGA CLEANER; is an environmentally friendly detergent used for cleaning epoxy-based joint fillers such as **FOX EPOXYFUGA FX142, FOX EPOXYFUGA FX142 PEBBLE,** and traces like joint material and stains on coating materials such for example, glass mosaic and FOX Pebbledeck pool coating.

Usage Areas

- Indoor and outdoor, vertical and horizontal application,
- It is used to clean epoxy-based joint fillers, joint material and traces such as stains on coating materials such as ceramic, glass mosaic and FOX Pebbledeck pool coating.

Advantages

- Facilitates cleaning of coating materials.
- It provides economical and very fast results.
- It cleans well, no need to rinse.
- Improves the surface quality of the joint filler.
- Suitable for all surfaces.
- Easy to apply and use.
- It is very fast and effective.

Technical Data

Structure of Material	Liquid
Density	1,010 gr/cm ³
Color	Transparent
Smell	Characteristic
pH	8,00
Application Temperature	+5°C/+ 35°C

The above values are given at +23°C and 50% relative humidity. High temperatures shorten the time, low temperatures increase the time.

Application Procedure

Surface Preparation

It is sufficient to take care that the surface is dry, and on soft and sensitive surfaces, a small area should be tested before the application. **FOX FUGA CLEANER** is a ready-to-use cleaning material that can be diluted with water at any rate. Shake the bottle well before opening.

Application

FOX FUGA CLEANER is available in 1 kg concentrate bottle (1 unit of **FOX FUGA CLEANER:** 10 units of water). Start the tile, glass mosaic cleaning while the grout is still fresh. When finished, pour **FOX FUGA CLEANER** in quantities into the cleaning tray. Next, clean the surface using a thick, oversized damp sponge, preferably made of cellulose. Use circular motions to soften the grout film on the tiles and clean the joint surface. Specific high dispersion polymers ensure that all mortar residues are removed using only a small amount of water. Excessive use of water impairs ultimate chemical resistance. Rinse frequently during cleaning and be sure to use properly clean water. If necessary, replace the sponge or felt cleaning pad when saturated with grout. It should be done with a sponge applied in the cross direction to prevent material from coming out of the joints. Wipe the cleaned surface again with a dry cloth to ensure it is completely clean and free of residual resin lines.

Cleaning of the Tools

FOX FUGA CLEANER residues can be removed from the instruments by rinsing them thoroughly.

Coverage

It is 100-200 gr/m² depending on the porosity and pollution of the existing floor.

Package

1 kg plastic bottle, 500 ml Spray Bottle (12 pcs/box)

Shelf Life

Shelf life is 12 months from the date of production when properly stored at room temperature, away from direct sunlight between +5°C and +30°C.

Storage

It should be stored in its unopened original package, in a cool and dry environment, protected from frost. In short-term storage, maximum 3 pallets should be placed on top of each other and the shipment should be made with a first-in, first-out system. In long-term storage, pallets should not be placed on top of each other.

Safety Precautions

It is dangerous to approach storage and application areas with fire. Storage and application areas should be ventilated. During the application, work clothes, protective gloves, glasses and masks in accordance with the occupational and worker health rules should be used. During storage and application, it should not be contacted with the skin and eyes, in case of contact, it should be washed with plenty of soap and water. If swallowed, a doctor should be consulted immediately. Food and beverage materials should not be brought into the application areas. It should be stored out of the reach of children. For detailed information, the Material Safety Data Sheet should be consulted.
